

# Valencia Extended Tab Pedicle Screw System

---

The Altus Spine **Valencia** Extended Tab Pedicle Screw System is a simple, effective pedicle fixation system that incorporates reliable rod delivery with dependable rod reduction. In less invasive procedures, the integrated extension tabs provide additional control and guidance during construct placement and locking.

Removable constraint collar provides additional control

30mm integrated rod reduction capability

Visual guidance for rod delivery and construct locking

Robust hybrid square thread minimizes cross threading during rod reduction

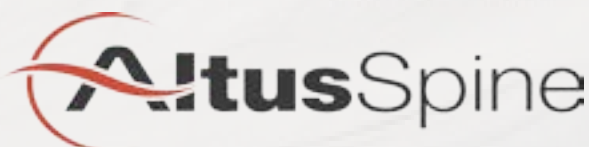

Reliable, over-the-skin rod length measurement

Dual lead cannulated screws

Refer to Product Insert (PI-001) for complete system description, warnings and precautions
